LeetCode: 300+ (1550) | [CodeChef](#): 1399 | [Codeforces](#): 900

## EDUCATION

**Pune Institute of Computer Technology (PICT), Pune**  
B.E. Information Technology (Honors in Cybersecurity)

2023 – Present  
CGPA: 7.89

## EXPERIENCE

**AI Full Stack Intern**  
March 2026 – May 2026

NeuraMach.AI

- Engineered backend services and **REST APIs** in **Python**, building **data pipelines** that fed real-time **AI inference** directly into user-facing features, working closely with frontend engineers on integration.
- Combined custom **Machine Learning** models with **Large Language Models (LLMs)** to build intelligent readiness engines, tuning **distributed systems** to hold consistent performance as load increased.
- Wrote **unit and integration tests** alongside API and pipeline changes, and built telemetry-processing architecture across enterprise **microservices** to keep data flow continuous and latency low.

## PROJECTS

**Civic-Tech Traffic Violation Detection System** *Python, YOLOv5, OpenCV, Tesseract OCR, Computer Vision*

- Built a real-time **computer vision** pipeline with **YOLOv5** and **OpenCV** that gives enforcement agencies an automated way to flag traffic violations directly from live video feeds, handling vehicle tracking and object detection end to end.
- Integrated **Tesseract OCR** for automated License Plate Recognition (ALPR), pulling vehicle registration data straight out of video frames without manual entry.
- Designed an automated reporting engine in Python that turns detection and OCR output into immediate, actionable violation alerts, cutting the time between a violation occurring and it being logged.

**scale0 - AI-Driven Automation Workflow (AIOps)**

*LangGraph, Agentic AI, Kubernetes, LLMs*

- Architected an autonomous GitOps remediation pipeline using **LangGraph** and **Agentic AI**, orchestrating **Generative AI** (Claude, Llama) for incident diagnosis and **AI-assisted DevOps** – leveraging AI tools at every stage of the workflow.
- Integrated the Model Context Protocol (MCP) for real-time log ingestion, enabling **LLM agents** to safely execute precise **Kubernetes** YAML changes and infrastructure updates.
- Built a hallucination-validation gate using **kubect1 diff** and a 3-strike self-correction loop, keeping remediation zero-downtime before any state sync.

**DentalAI - Generative AI Clinical Assistant & Triage System** *LangChain, RAG, Vector Search, LLMs, NLP*

- Built a conversational agent for dental professionals using **LangChain** and Retrieval-Augmented Generation (**RAG**) to fetch, analyze, and summarize the latest clinical research and trend reports.
- Engineered an automated clinical triage system processing unstructured patient data with **NLP**, assisting preliminary diagnosis and workflow prioritization.
- Integrated semantic search over medical literature using **Vector Databases**, enforcing strict data-privacy protocols for sensitive health records.

## TECHNICAL SKILLS

**Languages:** C, C++, Python, JavaScript, SQL

**Backend:** FastAPI, Node.js, REST APIs, PostgreSQL, MongoDB, Redis, Distributed Systems, Microservices

**AI / ML:** Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Large Language Models (LLMs), NLP, Computer Vision, YOLO, OpenCV, Tesseract OCR, LangGraph, Agentic AI, Vector Search

**DevOps & Tools:** Docker, Kubernetes, Jenkins, ArgoCD, Git, Linux, MLOps, Data Pipelines

**Practices:** Data Structures & Algorithms, Unit & Integration Testing, Agile Collaboration

## LEADERSHIP & ACHIEVEMENTS

- **2X Hackathon Winner:** Secured **1st Place at XENIA'26** for engineering a high-concurrency microservices architecture, and won the **Williams-Sonoma Hackathon** by building the *scale0* GenAI platform.
- **PICT ACM – Marketing Head & Event Lead:** Directed campus-wide marketing initiatives for the *Pulzion* tech festival, securing corporate sponsorships and scaling event participation to 6,500+ students.
- **Electoral Literacy Club – Team Lead:** Orchestrated large-scale civic engagement drives, leading the team to be officially recognized as the Best ELC in Maharashtra.
